

GPS/GSM Free Tracker

**Support GSM
850/900/1800/1900 MHZ**

ROHS COMPLIANT CE FC **FT-2000**

FT-2000 Free Tracker is a GPS/GSM tracking device which can be tracked and reports real-time geographic information.

By making a phone call from a 3G phone, Free Tracker will hang up the phone call automatically and send back GPS location information, as well as a Google Map link via an SMS (text message),

one can easily acquire the real-time position report from it. In addition, by pressing the SOS button for an emergency report to the authorized 3G phone, the towed away event can be managed and immediately reported to the user, Free Tracker is your Stella.

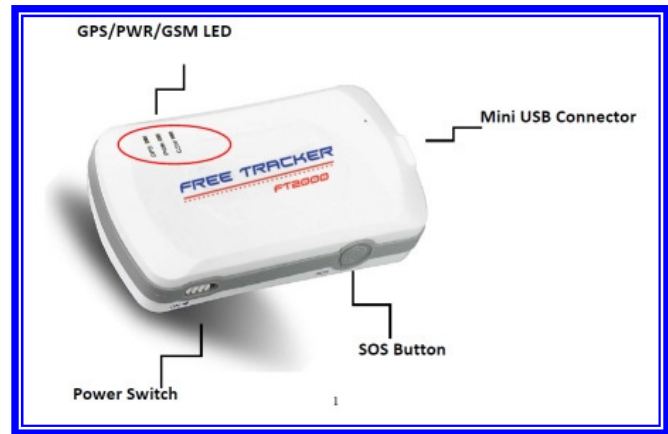

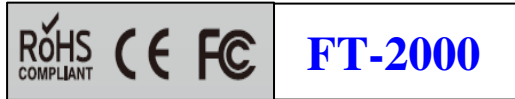

Free Tracker offers you total control and real-time location information via a Google Map link to your 3G phone. There is only one SMS cost for each operation and no monthly fee is required.

Moreover, a pre-paid GSM SIM card is available. Free Tracker can be your cost effective solution in vehicle security, children and elders protection, and pets or valuable asset tracking..

Functionality of Free Tracker

1. Real-Time location report via SMS by an authorized phone call.
2. Emergency report to a maximum of three authorized phone numbers via SMS.
3. Moving report to a maximum of three authorized phone numbers via SMS.
4. SMS tracking via cellphone/pc with free maps (Google Maps)
5. Low battery level report to the pre-set phone number.
